

## Index

No.	Experiment Name	Page
1	Polynomial Root Finder with Bisection and False Position Methods	
2	Finding root of $x^3-2x-5$ by Iteration and Newton-Raphson Method.	
3	Exploring Functional Values through Newton's Forward and Backward Interpolation Formula.	
4	Find the best values of $a_0$ and $a_1$ if the straight line $Y = a_0 + a_1x$ fits to the data of $(x_i, y_i)$ .	
5	Finding integration of $\frac{1}{1+x}$ by numerical methods Trapezoidal Rule, Simpson's 1/3-Rule & Simpson's 3/8-Rule.
